Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-3 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Podel '969 in view of Staples '561.

Podel '969 discloses a Sealed Package, comprising:

a glass bottle having an opening and a neck with external screw threads formed thereon;

an external closure in the form of an external metallic cap for covering the opening of the bottle, the external cap having internal screw threads which mate with the screw threads of the neck; and

an internal closure in the form of an imperforate crown cap secured to the bottle;

wherein the external cap substantially encloses the crown cap when the external cap is threaded onto the neck of the bottle.

Podel '969 does not disclose an external closure formed of glass/ceramic.

Staples '561 discloses a Sealing Container, having a glass cap for sealing a glass container. Staples '561 discloses the benefit of using glass in place of metal in col. 1, lines 53-

Art Unit: 3727

55, wherein it is disclosed using glass in place of metal provides the benefit of, "saving valuable metal and obviating corrosion."

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the bottle of Podel '969 with a glass cap in place of a metal cap so as to obtain the benefit of saving metal and obviating corrosion.

Further regarding claims 2-3 and 5, Staples '561, as modified in view of Podel '969, discloses the claimed invention, comprising:

(cl. 2) wherein the external closure includes an insert (15) that fits within the external cap,

(cl. 3) wherein the internal thread screws are carried by the insert,

(cl. 5) wherein the insert is comprised of plastic.

Regarding claims 2-3 and 5, examiner notes the teachings of Staples '561, located on page 3 of the Specification, lines 46-48, wherein it is disclosed, "With a glass container and a glass cap it is of course necessary that a layer of plastic be disposed between the threads," obviating the problem of friction between the threads of the cap and the container, as the Specification of Staples '561 discloses, in the second column of page 1, lines 2-8.

Response to Arguments

4. Applicant's arguments, on page 2 of the Request for Reconsideration, lines 14-17, filed 03 June 2003, with respect to the rejection(s) of claim(s) 1-3 and 5 under 35 U.S.C. 103(a) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of the application of new prior art.

Art Unit: 3727

Applicant vehemently disagrees with the Examiner's position that forming the bottle and cap from ceramic is an exchange of suitable materials.

Examiner notes the Specification of the present application, page 6, lines 5-7, wherein the applicant discloses, "As with the first embodiment, in the second embodiment of the invention, the bottle 112 and cap 118 may be made from glass, ceramic, or any other type of material known and used in the art." It is clear that while ceramic may be the preferred embodiment, applicant has clearly enabled the interchangeability of glass or ceramic for the present invention.

Conclusion

Applicant's amendment on 20 February 2003 necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
